Guiding Generations to Healthy Smiles

D. Andrew Kelson, DDS • Robert J. McCarty, DDS

## Good Mouthkeeping

Summer 2008 NewsCard

### Doctors Corner

We wanted to thank all of you who have been so supportive of the practice acquisition and assure others that we are moving positively in the right direction. We wanted to share with all of you our dental practice vision and logo that was recently designed which accurately describes what we want to do; “**Guiding Generations to Healthy Smiles**” sums it up nicely. We are so excited to finally unveil the logo.

Included in this edition of “Good Mouthkeeping” is the practice vision. We hope you would read it. We want to be your resource for your oral healthcare and promise to always look to the horizon in the pursuit of excellence, providing you the most current and well established practices to achieve optimum oral health.

— *Dr. Andrew, Dr. Bob, & the DH Team*

### The Dental Horizon Vision

The purpose of our office is to promptly serve our neighbors with a compassionate, professional, and friendly attitude as we provide comprehensive, quality, predictable, and long-lasting dentistry to achieve optimum oral health.

We promise our patients we will relentlessly pursue excellence in our individual fields through consistent daily improvement. We commit to continually educate ourselves in order to assist patients in making accurate decisions for their oral health. Their treatment and care will be catered to their needs.

We promise each other we will work as a high performance team in an environment of mutual respect. We enjoy our work, we value each other, and we cherish our patients in order to achieve our number one goal – To create a positive and memorable dental experience.

In so doing we hope to be a positive contributing member in our community and sphere of influence both personally and professionally.

For the latest information about oral health and our office, visit our website at [www.dental-horizons.com](http://www.dental-horizons.com)

Congratulations to the referral and no cavity club winners of a Texas Road House dinner, and Target gift certificate.

## Educational Open House on Dental Implants

Come join us for refreshments, door prizes, and some helpful information on dental implants and **receive a 10% discount on any implant retained restoration**. On Wednesday, October 15<sup>th</sup> at 5:00 p.m., we will be hosting an open house and free educational series on the benefits of implants and implant supported dentures for patients, their friends, and the community.

Do you or someone you love have missing teeth that is preventing them from fully enjoying a meal? Are you tired of having your denture or partial denture rub in places it shouldn't rub? Would you like to bite into foods again? Come join us and learn about the many exciting applications for dental implants.

Dental implants can replace roots and single teeth to prevent unwanted drilling on other teeth. Replacing missing teeth can prevent bone loss and tooth movement for improved oral health. Implants can also be used to retain dentures to maximize ones chewing efficiency. Dental implants can be used with your existing or your new denture to significantly increase the retention and fit allowing you to enjoy eating once again.

**To Paraphrase Mark Twain...** "The reports of my retirement have been greatly exaggerated." If you missed the letter earlier this spring, I have sold my dental practice to Dr. Andrew Kelson. I'm still in the office Monday through Wednesday.

**—Dr. Bob**

**THANK YOU** to everyone who referred friends & family!
